

Instructions:

Will you read all the instructions carefully and treat this study seriously?

Thank you very much! This study will take about 45 minutes to complete. Please read the instructions carefully, and avoid using the refresh or back buttons.

Please maximize your browser window.

The purpose of this experiment is to gauge art appreciation among college students.

In the first half of this experiment, you will be given a short prompt to answer.

In the latter half of this experiment, you will be shown a series of images. Your job is to indicate on a scale of 1 to 6 how visually pleasing the image is to you, with 1 being "not at all" and 6 being "very much".

The next page will be a short instruction quiz. (Don't worry, it's very simple!)

Quiz:

What is your job in this experiment?

Option1: Select this option if you do not remember the instructions.

Option 2: Responding to a prompt question and rating images.

Option 3: Providing written opinions on various artwork.

Instructions (cont.):

Awesome! You can press 'SPACE' to begin. Please maintain focus, avoid distraction, and try not to switch between other tabs and browsers.

CONSENT FORM

Distance Induction (tomorrow): Imagine that you are a student who has just graduated from art school. Because of your promise, you have just been hired by a local art association to plan and develop a small art exhibit to be held in your city tomorrow. Please create a 3-step plan for the way in which you might go about preparing for this exhibit.

**** We know that this task may be difficult. Don't worry, just try your best.**

Distance Induction (next year): Imagine that you are a student who will graduate from art school next year. Because of your promise, you have been hired by an art association to plan and develop a small art exhibit to be held in Grand Fenswick, Andorra next year. Please create a 3-step plan for the way in which you might go about preparing for this exhibit.

****** We know that this task may be difficult. Don't worry, just try your best.

BIF:

Great! You have just completed the bulk of this experiment. There is just one more section left which will take around 7 minutes to complete. You may take a break if you wish, or press 'SPACE' to continue.

In the last part of this experiment, you will be given an action and will have to select the option that you think best describes it.

DEBRIEFING:

You are almost done! Please answer these last 4 questions:

Did you complete this experiment seriously throughout (i.e., without responding randomly)?

You will still receive SONA credit, no matter what you respond. Please be honest for science!

Was any part of the procedure unclear? Did you have any problems completing any of the tasks?

What is your gender?

What is your age?

END:

You are done with this experiment. Please return to the SONA homepage.
